Art Unit: 3662

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-36, 50-61, drawn to a system and a method for locating a transmitter, classified in class 342, subclass 451.
 - II. Claims 37-49, drawn to a receiver, classified in class 342, subclass 385.
 - III. Claim 62, drawn to a method for determining the angle of arrival of signal, classified in class 342, subclass 442.
2. Inventions group 1 and group 2 or 3 are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention group 2 or 3 has separate utility such as in a system and a method without position indicating.
3. Because these inventions are distinct for the reasons given above and the search required for group 1 is not required for group 2 or 3 or vice versa, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dao L. Phan whose telephone number is (571)272-6976. The examiner can normally be reached on M-F 9:00-5:30.
